

DEU Innovations: Learning Today for Tomorrow's DEU

hosted by University of Portland School of Nursing

Friday, July 13th, 2018

Abstract Criteria and Submission Guidelines

The University of Portland symposium planning committee invites abstracts describing programs, courses, initiatives, or evaluation strategies that characterize the symposium theme: DEU Innovations: Learning Today for Tomorrow's DEU. Of particular interest are abstracts that address the symposium objectives:

1. Learn how innovations have advanced the DEU model.
2. Discuss strategies for successful DEU implementation across diverse settings.
3. Review findings from DEU research and program evaluation.
4. Discuss approaches for DEU sustainability and continuous quality improvement.
5. Establish a community of DEU scholars, administrators, and service-academe partners to guide future DEU development and implementation.

The abstract should include background information and a description of methods, programs, or practices. It also should include summary recommendations for others who may be considering a similar approach. Abstracts should describe original work and can include work in progress.

Selected abstracts are allotted either a 1 hour podium presentation or a poster. (Podium presentations are highly encouraged to include an interactive component as well as time for Q&A.) Authors are asked to indicate which format they prefer, although reviewers may suggest a different format to selected authors. Posters and abstract presentation may have already been presented elsewhere or published within the past two years. In that case, please plan to update the material and make it specific to this event.

Presenters will be asked to identify any potential conflict of interest related to the content to be offered and affirm that their abstract presentations will not be used to sell a particular product or service.

Abstracts will be accepted until February 28th, 2018.

To submit your abstract, please visit <https://nursing.up.edu/deu/symposium2018.html> and complete the Presenter Application.
